PROCEDURES:

School physical activities must be selected very carefully and be motivated on enhancing the educational experiences of students while considering the injury risk factors associated with the activity.

1. Curricular outcomes provide the rationale for engaging in any student centered activity and participation must be tied to achieving these outcomes.
2. Schools are prohibited from allowing students to participate in “Excluded Activities” identified in 302.9AP Exhibit 2 information.
3. Schools that are considering participating in the “High Risk Activities NOT Recommended” identified in 302.9AP Exhibit 2 information must request written approval from the Superintendent of Schools.
4. Schools who are participating in the “High Risk Activities” identified in 302.9AP Exhibit 2 information must adhere to the expectation outlined in the “School Physical Activity Health & Education Resource for Safety”(SPHERES). Schools who are participating in the activities identified in item 3 must complete the Physical Activity Notification (Exhibit 1)
5. Participation in other physical activities not identified in 302.9AP Exhibit 2 information must be conducted in strict adherence to the “School Physical Activity Health & Education Resource for Safety” (SPHERES).
